## SLB Group Rides and Runs

You are welcome to join us on our weekend rides and runs. These are unofficial workouts, just a group of athletes getting together to do longer rides and runs. All levels of fitness are welcome, I'm pretty out of shape myself, so you'll not be the slowest in the group. The cost for riding or running with us is: have fun, buddy up with someone and watch-out for each other, help each other out and have FUN. Did I mention the surcharge? HAVE FUN!

I'll be offering assistance with flats and basic bike maintenance and care as usual. But, you should always ride with 2 spare tubes, a frame pump (or CO2 cartridges), tire levers, basic bike tool, water & electrolyte replacement fluid, food - energy bars, gel packets or a bagel, identification, medical ID, cash and a credit card. I'll provide route maps and directions, stories and a few jokes!

We wait about 5 to 10 minutes for those that have difficulty getting up on the weekends.

In order to avoid confusion and potential problems, please use the following policy concerning group rides and runs:

### *Group Runs*

**Ice and Snow** – If the roads are covered with either **ice or snow**, the group run will be cancelled.

**Temperature** – When the temperature or the Wind Chill is **below 0°**, the group run will be cancelled.

# SLB Coaching & Training Systems

## SLB Weekly Newsletter

**Weather Warnings** – Any **weather advisory** or **storm warning** will cancel our group run.

### *Group Rides*

#### **Ice and Snow** –

If it is **snowing or sleeting** or the roads are covered with either **ice or snow**, the group ride will be cancelled.

**Temperature** – When the temperature or the Wind Chill is **below 35°**, the group ride will be cancelled.

**Wind** – Severe wind conditions will also cancel our group ride. Winds **above 25 mph** or **gusts above 35 mph** will cancel our group ride.

**Rain** – Heavy rain will cancel our group ride.

**Weather Warnings** – Any **weather advisory** or **storm warning** will cancel our group ride.

These guidelines are safety precautions. You will need to use your judgment and common sense. If you feel uncomfortable about running or cycling in the weather conditions, don't! And, if you arrive at the meeting location and no one is there – go home and don't ride!

You are better off skipping a run or ride in bad weather and making up the workout on an off day.

### **Saturday, December 28**

**SLB Group Ride**, meet @ Loeb Boathouse, Central Park 8 am. Nyack, NY via NJ Rt. 9W. Return via Rt. 501 and Jones Road through Fort Lee. (Route Sheet available via e-mail) 50+ miles.

### **Saturday, January 4**

**SLB Group Ride**, meet @ Loeb Boathouse, Central Park 8 am. Nyack, NY via River Road, the Alpine Hill, Rt. 9W. Return via Rt. 501 and Jones Road through Fort Lee. (Route Sheet available via e-mail) 50+ miles.

### **Saturday, January 11**

**SLB Group Ride**, meet @ Loeb Boathouse, Central Park 8 am. Nyack, NY via River Road, the Alpine Hill, Rt. 9W. Return via Rt. 501 and the Walnut Street Hills. (Route Sheet available via e-mail) 50+ miles.

## Race News

The Mercury Masters have won the Veterans Women's Team Points Championship! The new team of over 50 year old women clinched the points title with outstanding performances by a number of team members and the support of the entire team.

If you are a woman over 50 and are looking for a group to run with, go to there website: <http://www.MercuryMasters.org> for more information. Although they are now the top over 50 women's team in NYC, they welcome women of all abilities.

---

## Training News

### **Post Workout Nutrition – Chocolate Milk!**

*From Running Research News, Volume 18, Issue 7, September 2002*

Research conducted by Mark Tarnopolsky, among others, has shown that the timing of a high carbohydrate diet can greatly enhance muscle glycogen levels. Eating a high carbohydrate meal within 30 minutes of either endurance or resistance exercise appears to improve total daily muscle glycogen re-synthesis. Additionally, this routine also positively effects protein metabolism.

One to two grams of carbohydrates per kilogram of body weight within 20 to 30 minutes after exercise. In addition you should be consuming 10 to 20 grams of protein. It's suggested that natural foods, not special drinks, be used because we assimilate amino acids better when they come from balanced proteins in real food.

## SLB Weekly Newsletter

And the ideal post workout food? Chocolate Milk!

Eating carbohydrates immediately after endurance or resistance workouts improves re-synthesis of glycogen. This also improves protein metabolism.

Proteins are made of amino acids. Breaking down branched-chain amino acids is controlled by an enzyme – BCOAD. A protein rich diet increased BCOAD activity. But, the presence of carbohydrates reduces the activity of BCOAD. Thus, proteins are not broken down. Training also reduced the activity of BCOAD. This is a good thing, since muscles are mostly protein, they will be broken down less and able to build with reduced BCOAD activity.

High volume training will deplete muscle glycogen and can lead to a “negative nitrogen balance,” because we are losing more protein than we can build. This is especially a problem for women, who tend to have low protein and calories intake.

Mark Tarnopolsky of McMaster University, Hamilton, Ontario performed a study on post exercise diets. Their overall diet was 58% carbohydrates, 16% protein and 26% fat calories. The post exercise beverage (Results from Mead-Johnson, Canada) was 66% carbohydrate, 23% protein and 11% fat calories. The post exercise beverage was taken immediately after exercise, instead of prior to exercise.

The Results were that more fat was used during exercise (a good thing). More importantly, when Results was taken after exercise, Nitrogen Balance was positive (a very good thing – protein stores were increased). Weight loss was also reduced. Most importantly, when Results was taken after exercise, the athletes were able to exercise 47% longer at the end of the test! The only difference was the timing of the intake of Results – before or after exercise.

In addition, eating carbohydrates after exercise increases insulin in the blood. Studies have shown that this results in a positive protein balance. Muscles lost 30% less protein post exercise after eating carbohydrates. Muscles were able to build-up in response to the training. Muscles took up three times the amount of Alanine ( a specific amino acid).

The bonus is that you will have a better training session on the following day! Remember, muscles are most receptive to taking up carbohydrates in the 2 hours immediately following exercise. But, the rate of up-take diminishes after 30 minutes.

Tarnopolsky recommends eating a minimum of 1 gram of carbohydrates per kilogram of weight (2 grams are better) within 20 minutes, and 10 to 20 grams of protein are suggested.

Skim chocolate milk is the best source of the carbohydrates and protein:

Two cups of skim chocolate milk, 1 cup of an electrolyte/energy drink, one banana and a bagel. This will provide:

### **2 cups of skim chocolate milk**

18 Grams Protein

52 Grams Carbohydrates

### **1 cup of electrolyte/energy drink**

Page 6 of 9

# SLB Coaching & Training Systems

## SLB Weekly Newsletter

15 Grams Carbohydrates

**1 banana**

28 grams Carbohydrates

**1 bagel**

38 grams Carbohydrates

**Totals:**

133 Grams Carbohydrates

18 Grams Protein

Whey protein from milk is rapidly absorbed, while the casein protein from milk is absorbed more slowly.

This post exercise meal is particularly important if you are doing two a day workouts. Normally, it takes 24 hours to absorb carbohydrates. So, it's critical to get that carbohydrate boost.

## Clinics

### Cycle Clinics – Wednesday 6:30 pm – 7:30 pm

These are a series of free clinics for the **Cyclists** and **Triathlete**. They cover Bike Fit – Getting the Most Out of Your Bike, Bike Maintenance, Tire Changing, Transition – Getting it Right!, Getting Ready for Competition, a Race Ready Bike and USAT Rules. They are offered free of charge at local bicycle shops and at local triathlon races.

There are a series of free clinics for **Cyclists**. They cover Bike Fit – Getting the Most Out of Your Bike, Bike Maintenance, Tire Changing, Bike Pedals – Toe Clips or Clipless?, Bike Gears & Shifting Skills, Cycle Clothing, Nutrition for Cyclists – Eating Right. They are offered free of charge at local bicycle shops.

## USA Triathlon – Membership Fees go up

COLORADO SPRINGS, Colo. (Dec. 9, 2002) – Responding to increasing insurance costs among other issues, the USA Triathlon Board of Directors voted at the last board meeting to raise the costs of USAT annual and one-day memberships.

The cost of an annual membership will go from \$25 to \$30 per year. The cost of a one-day membership will increase from \$7 to \$9. The change will take effect Jan. 1, 2003. The cost of a pro/elite license will go up from \$75 to \$90. USA Triathlon has not changed the cost of an annual membership since 1993, when the price dropped from \$32 to \$25.

Some membership costs will be staying the same. The cost of a silver membership will remain \$100 and the cost of a gold membership stays at \$200. A youth annual membership is still \$15 and a youth one-day is still \$3.

The increased costs reflect a predicted 30-percent rise in USA Triathlon's insurance premiums for 2003. USA Triathlon provides its members with health insurance coverage over and above their own, should they be injured during a USA Triathlon-sanctioned race. Annual members are insured for the year. One-day members are insured for the day.

USA Triathlon also provides liability insurance for events. Event liability insurance protects race directors, venue owners, athletes, sponsors, spectators and volunteers. It is comprehensive and is the principal tool that allows race directors to their events.

The fee increase will also help fund new USA Triathlon initiatives, such as the hiring of a duathlon coordinator to help that discipline prosper. The organization will also be hiring a full-time risk manager to monitor race safety, which can help prevent future insurance and membership cost increases by decreasing the number of accidents and injuries. "I have made no secret of the fact that, as president, I want our federation to become more of a service organization rather than just a governing body," said Ray Plotecia, president of the USA Triathlon Board of Directors. "With continuing growth comes an expanded requirement to provide service. The duathlon coordinator and risk manager were necessary to provide that support."

### Swim Stroke Video Tape Analysis

We now offer private and group Swim Stroke Video Tape Analysis. Using an underwater video camera we will tape your stroke and provide an analysis of your technique.

One of the key tools for stroke improvement is Video Tape Analysis. The ability to make stroke corrections depends on a good body awareness – a good kinesthetic sense. It is difficult to break old habits. It is especially difficult when you do not have a good image of your stroke.

Using an underwater video camera and taping your swimming, we can greatly improve your kinesthetic sense, awareness of your stroke, body position, mechanics and stroke.

We do private Stroke Video Tape Analysis. These are 15 minutes, 30 minute or 60 minute sessions of underwater and above water video taping of your swimming. We will tape you from the end of the pool – head on view, and from the side of the pool as you swim – side view.

Contact us for more details.

---

### Miscellaneous – Athlete Public Service Announcement

BEAT MANHATTAN RENTS, SLEEP LATER, GET TO WORK FASTER. Did you know you can get to Midtown from Astoria in just 20 minutes? Peter Burger is looking for a roommate starting in mid February. He lives in a nice two-bedroom apartment in this hip section of Queens. Located just three stops from 59th St./Lexington Ave. on the N/R line. Bedroom furnished with armoire; faces East (sunlight!). Large kitchen and living room. Parquet floors. \$650/month. Contact Peter at [peter.burger@ey.com](mailto:peter.burger@ey.com) or at 917-517-5748 on the weekend or 212-773-6673 (work) during the week.
